TECH LEAD

Engineering Robust and Scalable Crypto Solutions to Shape the Future of FinTech

Accomplished and tech-savvy, with a profound track record in the technology sector, specializing in software development, system architecture, and team leadership. A solid history of success in diverse industries, including finance, logistics, aviation, and social media, with a keen emphasis on the FinTech and cryptocurrency spaces. Proficient in multiple programming languages, holding a strong command of Go, Python, and .NET/C#, along with experience in C, C++, and JavaScript. Skilled in leading projects from gathering requirements to deploying scalable solutions, ensuring system interoperability while fostering a culture of technical excellence.

AREAS OF EXPERTISE

Software Development / Trading Solutions / Microservices Architecture
Distributed Systems Engineering / API Development & Integration / Technical Project Management / Cloud Computing
Continuous Process Improvement / Team Building & Leadership / Training & Development

PROFESSIONAL EXPERIENCE

Trade Republic Bank – Berlin, Stockholm | Remote — Aug 2024 – Dec 2024

Europe's mobile-first broker driving democratized access to capital markets with a security-first, data-driven platform at continental scale.

Senior Software Developer

Senior engineer in the core post-trade domain responsible for clearing orchestration, and securities settlement. Built and operated services spanning allocations, settlement instruction creation, reconciliation, and lifecycle events across brokers, custodians, and CSDs.

- **Allocation & Netting:** Implemented allocation logic and optional netting/aggregation rules to minimize settlement fails and reduce operational burden and fees.
- **Settlement Instruction:** Built STP pipelines to generate and transmit settlement instructions to custodians/CSDs via standardized protocols and provider APIs, handling cut-offs, holidays, and market calendars.

Börse Stuttgart Digital – Berlin | Remote — Jan 2022 – May 2024

Europe's premier regulated digital and crypto asset solutions platform offers an integrated suite of trading, brokerage, and custody services. It focuses on innovation, trust, and customer satisfaction to secure digital asset market access.

Tech Lead / Team Lead — *Oct 2022 – May 2024*

Led and mentored a team of skilled engineers to deliver cutting-edge solutions for Börse Stuttgart's digital trading platforms. Shape the technical strategy, ensuring alignment with industry standards, security protocols, and a focus on continuous improvement. Collaborate with key stakeholders to translate business needs into robust technical implementations.

- **Trading Engine Innovation:** Spearheaded the strategic design and development of the BSDEX Trading Engine, focusing on creating a robust Matching Engine and Bookkeeping Service to enhance trading efficiency and accuracy.
- **Interface Innovation:** Led the creation and refinement of internal mechanisms (such as Market Supervision and Price Information) and external channels (REST API, FIX & WebSocket Gateway).
- **Team Leadership:** Cultivated a high-performing Trading Engine Team through staff management and selection, ensuring optimal alignment between individual capabilities and project demands to consistently exceed expectations.

Senior Software Developer — *Jan 2022 – Oct 2022*

Engineered BSDEX Matching Engine and related services, building core mechanisms for efficient and secure digital asset exchanges. Created internal tools for market supervision and price information dissemination alongside external interfaces, including REST API, FIX, and WebSocket gateways, facilitating robust, real-time connectivity with diverse trading platforms.

- **Technical Project Management:** Exhibited unparalleled technical expertise by leading the development of sophisticated software solutions, contributing to the robust architecture and seamless user experience.
- **Strategic Implementation:** Validated optimal performance and scalability by guiding strategic initiatives to develop critical internal and external communication channels.

Sennder GmbH – Berlin | Remote **Sep 2020 – Nov 2021**

A dynamic digital road freight logistics platform, revolutionizing the trucking industry by connecting commercial shippers with carrier companies through innovative technology.

Senior Software Developer

Conducted regular code reviews to ensure high-quality software development practices and adherence to coding standards. Collaborated with cross-functional teams to identify system requirements and incorporate user feedback into development processes. Engaged in continuous learning and research to stay updated with the latest technology trends and advancements while enhancing diverse projects through gained knowledge.

- **Real-time GPS Tracking:** Developed GPS tracking services for the Sennder digital freight forwarding platform, enhancing shipment visibility and operational efficiency.
- **Microservice Architecture:** Designed and developed scalable microservices using Python 3 and Go, promoting code modularity and streamlining development processes.
- **Third-Party Integration:** Integrated third-party GPS visibility platforms, broadening data insights and optimizing tracking capabilities for complex logistics networks.

PaxLife Innovations GmbH – Potsdam **Aug 2016 – May 2020**

An innovative technology company focused on enhancing passenger experience through digital entertainment and connectivity solutions in the aviation and rail industries.

Head of Software Development *Dec 2017 – May 2020*

Led the development of PaxLife's innovative in-flight entertainment and passenger experience software platform. Managed the architecture, development, and deployment of solutions across the airSTACK product line. Collaborated cross-functionally to ensure software solutions aligned with passenger needs, industry trends, and business objectives.

- **Architectural Leadership:** Achieved a seamless blend of cloud and embedded systems by commanding the visionary software architecture design for the Aircraft Platform airSTACK.
- **Standards Compliance:** Ensured backend development strictly followed DO-178C/ED-12C standards whilst maintaining the highest level of quality and reliability.
- **Innovation in Communication:** Pioneered the development of cutting-edge satellite communications middleware and container orchestrator, employing Go for unparalleled efficiency and scalability.

Senior Software Engineer *Aug 2016 – Dec 2017*

Designed and architected robust, scalable software solutions across various platforms and technologies. Implemented well-structured, testable, and maintainable code by adhering to standards. Troubleshot and resolved complex technical issues within production systems. Collaborated with cross-functional teams to deliver high-quality software solutions.

- **Simulation Development:** Pioneered the creation of a "Flight Simulator" utilizing Go, capable of simulating various aircraft via the ARINC 429 Avionics Databus, aimed at enhancing testing accuracy and efficiency in aviation systems.
- **Mobile Application Initiative:** Conceptualized and developed a Proof-of-Concept Android Wear app to deliver essential flight information directly to cabin crews, improving onboard communication and operational efficiency.

ADDITIONAL EXPERIENCE & APPRENTICESHIP

Python Developer, Brand.Meister, Düsseldorf, Germany | July 2015 – March 2016

Python Developer, M.I.R. Media, Cologne, Germany | Feb 2014 – March 2015

C# Developer, Lise GmbH, Cologne, Germany | Nov 2012 – July 2013

Python Developer, Starmeo Betriebs GmbH, Cologne, Germany | Sep 2011 – Aug 2012

Apprentice C# Developer, Prosozial GmbH, Koblenz, Germany | Dec 2009 – June 2011

Apprentice C# Developer, CompuMaster GmbH, Emmelshausen, Germany | Aug 2008 – Sep 2009

TECH SKILLS

Programming Languages: Python 2 & 3, C/C++, GO, C#, VB.Net, JavaScript, Kotlin

Web: Flask, Django, ASP.Net MVC, nginx

Databases: PostgreSQL, SQLite, MySQL, MongoDB, Redis

Container: Docker, rkt, LXC, Kubernetes

Message Queues: RabbitMQ, ZeroMQ, Kafka

Version Control Systems: Git, SVN, TFS

Project Management: Jira, Confluence

LANGUAGES

German – Native **| English –** Fluent
